BIOL 3295 – Population and Evolutionary Ecology

Instructor Information
Instructor: Dr. Amy Hurford
Office: SN-1093 (x8301)
Email: Please email me via `Brightspace`
Office hours: M 9-11am

Course Information

Lecture	Lab
TR 12.00-12.50pm	W 2-5pm
F 1-1.50pm	SN-4110, 4116F and 3000
SN-2067	

Course description: *Population and Evolutionary Ecology* is an introduction to the theory and principles of evolutionary ecology and population dynamics. Pre-requisites**:** BIOL 2600; at least one of BIOL 2010, 2122 or 2210.

Course format:
Prior to lecture. Readings are to be completed before some lectures (see *1.1 Lecture Schedule* and *1.3 Readings* for more details).

Lecture. There are 3 x 50 minute lectures each week. Lectures will be a combination of *me* lecturing and *you* problem solving, running simulations, and analyzing data to understand how to answer research questions in population and evolutionary ecology.
   ▪ Plan to bring a laptop computer with the recommended software installed (see *1.5 Software* for installation instructions).

Labs. There are 8 x 3 hour labs. See *1.2 Lab Schedule*.

Course expectations: Any students that are disruptive, violating university policies, or acting in a potentially unsafe way will be warned and asked to leave.

Learning goals
   • Understand key concepts
   • Perform calculations
   • Know how to gain knowledge and assess information sources
   • Gain some experience running simulations and coding

Required Text and Readings
   • I will conduct a computing resources survey on the first day of class. Please notify me if you have limited access to computing resources.
   • All readings are available online via the links in *1.3 Readings*, or can be accessed via the library website.

- `Brightspace` – will be used: a) to make announcements (in addition to in class); b) for class-related emails; c) to disseminate grades; d) for students to post questions on the readings.
- `Github` – Lecture slides, Labs, and other resources will be available to download at https://github.com/ahurford/BIOL-3295

Method of Evaluation
- Assignments 20%
- Midterm (take home) 20%
- Labs 20%
- Final exam 40%

Late assignments, labs, and missed midterms, and final exams will be accommodated as described by University Regulation 6.7.3 and 6.7.5 (see https://www.mun.ca/regoff/calendar/sectionNo=REGS-0474 for Regulations). The Final exam will cover all Lecture material and readings, but not Labs. Specific regulations governing final examinations are described by University Regulation 6.8. Lecture participation is highly recommended and practice problems completed during lectures may appear on Assignments.

1.1 Lecture schedule

Week 1 Fri Sept 6	**What is a population and why does is matter?**
Week 2 Tues Sept 10	**What is evolutionary ecology?** • Björklund, 2019. **Estimating population size** • Sacchi et al., 2002. • Skalski et al., 2005. Description of Common Indices. p374-394
Week 3 Tues Sept 16	**Discrete and continuous time population dynamics** **Exponential/geometric growth** • Vandermeer and Goldberg, 2013. p1-8 (beginning after the Exercises on p4) **Assignment 1 due**
Week 4 Tues Sept 23	**Density dependence** • Vandermeer and Goldberg, 2013. The Logistic Equation. p13-17 • Vandermeer and Goldberg, 2013. Density dependence in discrete time models. p28-29
Week 5 Tues Sept 30	**Evolution in low- and high-density populations** • "Zombie ideas in ecology," 2011 • Pianka, 1970 • Travis et al., 2013
Week 6 Tues Oct 1	**Age structure** • Vandermeer and Goldberg, 2013. Elementary Age Structured Projection Matrices. p30-39 **Stage structure** • Vandermeer and Goldberg, 2013. Non-Age Structure: Stage projection

	models. p39-47 • Kendall et al., 2019 **Assignment 2 due** **MIDTERM AVAILABLE**
Week 7 Tues Oct 8	**Evolution of life history strategies** • Vandermeer and Goldberg, 2013. Life History Analysis. p63-72
Midterm break Week 8 Thurs Oct 17	**Structured populations - space** • Vandermeer and Goldberg, 2013. Metapopulations. p142-151 **MIDTERM DUE**
Week 9 Tues Oct 22	**Structured populations – space** • Andow et al., 1990 **Evolution in spatially structured populations** • Lion and Baalen, 2008
Week 10 Tues Oct 29*	**Population dynamics in seasonal environments** • Saunders et al., 2019
Week 11 Tues Nov 5	**Population dynamics in a warming world** • Walsh et al., 2019 • Baltar et al., 2019 **Assignment 3 due**
Week 12 Tues Nov 12	**Evolution in a warming world** • Edelaar and Bolnick, 2019
Week 13 Tues Nov 19	**Stochastic population dynamics** • Chapter 13: Probabilistic Models https://www.zoology.ubc.ca/biomath/ **Evolutionary in fluctuating environments** • Sæther and Engen, 2015
Week 14 Tues Nov 26	**Big questions in evolutionary ecology** • Reading TBD

*Oct 30 is the last day to drop fall semester courses without academic prejudice.

1.2 Lab schedule
- For labs you should, bring your own laptop computer with software installed to work on (recommended; see *1.4 Software*).
- On Sept 16, Lab 2a will require, walking to and through bush in Pippy Park. Please dress appropriately.
- You will need a Github account to contribute data and code for Labs 5 and 7. (see *1.4 Software*)

Sept 11	Lab 1: Getting started in R/Duck data collection	`R/RStudio`
Sept 18	Lab 2a: Pippy park – data collection*	–
Sept 25	Lab 2b: Pippy park – data analysis	`R/RStudio`
Oct 2	Lab 3: Testing for density dependence	`R/RStudio`
Oct 9	Lab 4: Stage structure	`R/RStudio`
Oct 23	Lab 5: Life history evolution	`R/RStudio; Github`

Oct 30	Lab 6: Spatial and stochastic population dynamics	`R/RStudio; Netlogo`
Nov 20	Lab 7: Ducks on Burton's pond	`R/RStudio; ImageJ`

1.3 Readings

- All of the readings are available as online resources available from the MUN library website. The journal articles should be accessible via the links, but you might also be able to access them via *Web of Science* from the library website.
- See *1.1 Lecture Schedule* for the timing of the readings and see *1.4 References* for full bibliographic information.
- Prior to the day that a reading is due, you should post any questions or comments you have on the reading to the *Discussion* on `BrightSpace`. If you are having trouble viewing any of the required readings, please contact myself, or a teaching assistant.
- Please consult *"How to Read a Scientific Paper"* (2014) for the recommended approach to 'reading' journal articles. Steps 1,2, and 4 are good advice, but step 3 may not be relevant for some readings.
- Readings from textbooks (i.e., Vandermeer and Goldberg, 2013) can be read linearly (from beginning to end).

Additional Policies
Accommodation of students with disabilities
Memorial University of Newfoundland is committed to supporting inclusive education based on the principles of equity, accessibility and collaboration. Accommodations are provided within the scope of the University Policies for the Accommodations for Students with Disabilities (www.mun.ca/policy/site/policy.php?id=239). Students who may need an academic accommodation are asked to initiate the request with the Glenn Roy Blundon Centre at the earliest opportunity (www.mun.ca/blundon).

Academic misconduct
Students are expected to adhere to those principles, which constitute proper academic conduct. A student has the responsibility to know which actions, as described under Academic Offences in the University Regulations, could be construed as dishonest or improper. Students found guilty of an academic offence may be subject to a number of penalties commensurate with the offence including reprimand, reduction of grade, probation, suspension or expulsion from the University. For more information regarding this policy, students should refer to University Regulation 6.12.

Equity and Diversity
A safe learning environment will be provided for all students regardless of race, colour, nationality, ethnic origin, social origin, religious creed, religion, age, disability, disfigurement, sex (including

pregnancy), sexual orientation, gender identity, gender expression, marital status, family status, source of income or political opinion.

You should not photograph or record myself, teaching assistants, or other students in the class without first obtaining permission. Accommodation will be made for students with special needs.

The sound should be turned off on phones and computers during class.

Additional Supports
Resources for additional support can be found at:
- www.mun.ca/currentstudents/student/
- https://munsu.ca/resource-centres/
